

**Surface Protection of Highest
Quality and Affordability.
The Optimum Solution for Your
Application.**

**Together
ahead. RUAG**

Thin Layers of Huge Importance.

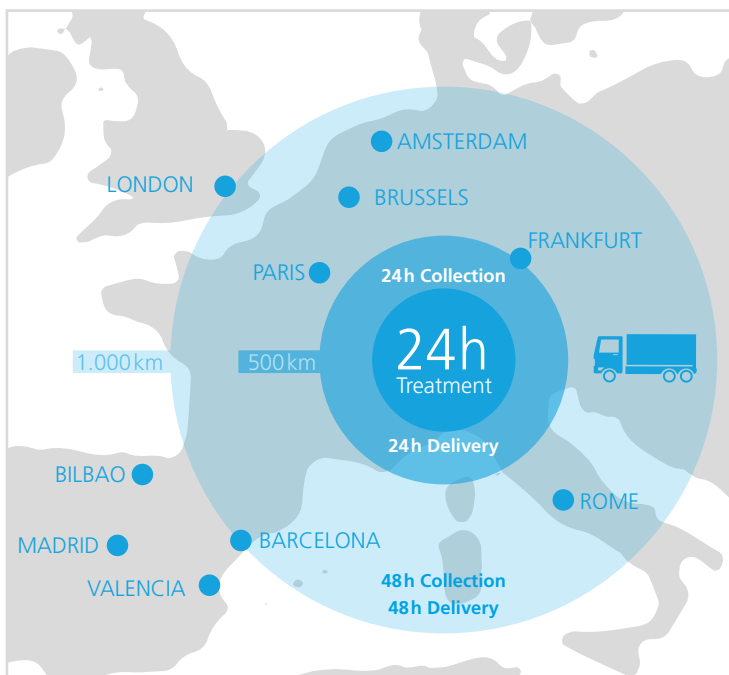

Surface Protection for the Aerospace Industry.

Surface protection is a combination of quality with economy and sustainability. RUAG Aerostructures provides surface protection services of highest quality and affordability - the optimum solution for your application.

High tech equipment for flawless quality and first run rates. The new surface treatment facility in Emmen, Switzerland, allows RUAG Aerostructures to provide surface protection services for the Aerospace Industry, exceeding expectations towards quality and cost efficiency while remaining environmentally sustainable. This surface treatment

facility provides long-term value, fully protecting Aerospace components of up to 7 meters in length. With the latest automation technology, we set high standards on quality and affordability. With our 24-hour fast-track service, we set new standards in the industry.

Your competitive advantage

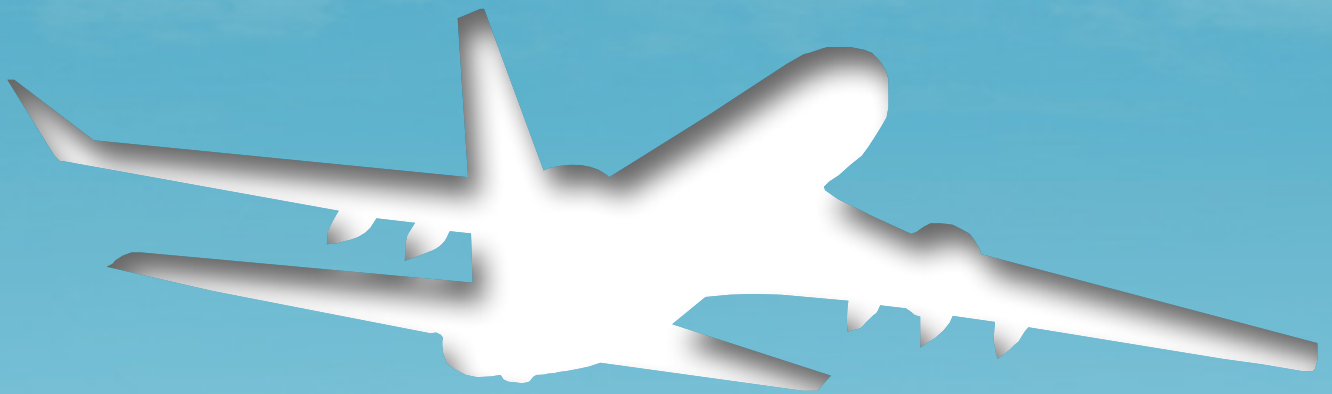

- Components with dimensions of up to **7000 x 2300 x 1000 mm**
- **One-stop shop** covers the entire value chain
- Highly **automated process**
- Affordability through **economies of scale**

Faster to your product

- Optimized, **end-to-end flow** of materials
- Expedited **24-hour fast-track service**
- **Short distances:** a site in Europe's center

Sustainability with added value

- Fully **REACH compliant**, chromium-free anodizing (**TSA**)
- Highest **energy efficiency** through heat recuperation
- **Effluent free** production

Affordability Through Economies of Scale
Eco-Friendly Production

The Future of Surface Treatment

RUAG is setting industry standards with its new, state-of-the-art surface treatment facility, producing faster, more efficiently, more sustainably and more affordably than ever before. Convince yourself of our new class of efficiency and precision.

Sustaining Precision.

Our Commitment to High Performance.

RUAG Aerostructures, a global tier-1 supplier with a service portfolio for the design and production of aircraft fuselage sections, wing components, modules and systems, with a total of 1100 employees at three sites in Emmen (Switzerland), Oberpfaffenhofen (Germany) and Eger (Hungary), has a broad product portfolio for civil and military customers and OEMs. Highly qualified specialists, decades of experience and state-of-the-art technologies enable us to provide you with outstanding service quality and productivity.

Performance for challenging demands

Our services

- Full service **one-stop shop**
- **Large dimension** components capacity
- Affordability through **automation** technology
- **24-hour** fast-track service
- Aerospace **certified** processes
- High tech equipment for flawless **quality**
- Outstanding vertical integration
- Highly qualified, **experienced team**
- **Awarded performance** and quality
- REACH compliant **TSA** process
- High **energy efficiency** sustainable production

On time, on budget and of outstanding quality:

The high quality of our products and the long-term satisfaction of our customers is reflected by certifications and awards:
